

This image is a horizontal strip of abstract digital art. It features a repeating pattern of colored pixels arranged in a grid. The colors used include red, yellow, green, blue, and magenta. The pattern is composed of small, square blocks of color that create a textured, almost noise-like appearance. The overall effect is reminiscent of a low-resolution digital image or a specific type of abstract digital artwork.

The figure displays a 3D surface plot representing a function of three variables. The vertical axis is labeled with values from -0.05 to 0.05. The horizontal axes are labeled with values from 0.0 to 0.5. The surface exhibits multiple peaks and troughs, with a prominent central peak reaching approximately 0.05. A color bar on the right side of the plot provides a scale for the function's output, ranging from -0.05 (dark blue) to 0.05 (yellow). The labels 'W' and 'H' are positioned at the top left and top center of the plot area.
